PROFILE

I write backend code: services, APIs and data work. On the side I'm into genetics, bioinformatics and machine learning. I like the finicky problems that have to be understood properly rather than closed quickly.

WHERE I'M HEADED

Q# and quantum technologies. I want to work on this seriously, not watch from the side.

SKILLS

Confident

C# · Python · Java · PHP · JavaScript · PostgreSQL · MariaDB · Redis · Memcached

Hands-on

Docker · Kubernetes · pandas · NumPy · scikit-learn · PyTorch · Biopython · scikit-bio · BioJava

Learning

Q# · Quantum computing

WHERE I'VE USED IT

C# my main language, services and anything serious.

Python backend, scripts, ML and anything I need to crunch fast.

PostgreSQL the default database in my projects, Redis on top for caching.

LANGUAGES

Russian (native) · English · 中文 (learning)

PROJECTS

Commercial and personal projects live in private repositories. Happy to discuss details in person.

Interesting backend, quantum or bioinformatics problems: write to me and I will answer.
